EXTINGUISHER RELEASE PANEL SIMPLIFIES SYSTEM INTEGRATION

From the global leader in fire suppression technology comes an innovative control panel that streamlines bulky, multi-part systems into a single unit. Designed to integrate with Sea-Fire Marine's "H" Series engineered fire suppression systems, the new, two-stage Extinguisher Release Panel allows for a controlled release of extinguishing gas in protected areas.

Reducing installation time and saving weight, the compact, low-voltage Extinguisher Release Panel provides unmatched flexibility. Microprocessor-controlled, it offers pre-discharge alarms, 30-second time delay, discharge abort facility and comprehensive fault monitoring.

Measuring just 10" L x 7" W x 3" D, the modular unit operates on 24V DC power. RoHS and CE compliant, the Extinguisher Release Panel's polycarbonate enclosure, connections and switches are completely sealed. It is also Type Approved by RINA.

Sea-Fire Marine provides FM-200 engineered and pre-engineered marine fire suppression systems and accessories. Fast and effective, the environmentally-friendly FM-200 agent is safe for people and equipment.
